

Have you ever wondered what its really like for an astronaut in outer space? From the exciting moments to the day-to-day details, from the serious to the humorous, youll find answers to every question youve ever had about living in space!What does it feel like to be weightless? Would a sneeze propel you backward? What happens to your body in space? And, most importantly, how do you go to the bathroom in space?Find out the answers from the astronaut who for more than a decade held the world record for the number of days spent living in space!To take advantage of the renewed interest in space travel, thanks to the success of Packing for Mars, this re-release of the bestseller (with over a quarter million copies in print) features a fresh look, dozens of authentic NASA photographs, and an introduction by John Glenn.

Statistical Demography and Forecasting (Springer Series in Statistics), Developments and Trends in Infinite-Dimensional Lie Theory, Cell Physiology, Differential Geometry: Frame Fields and Curves Unit 2 (Course M434), Lun Yu - Gespräche (German Edition),

ISS residents go to the bathroom into a little plate-sized hole on top of that silver can, using the fan to vacuum-suck the excrement away. After the astronauts are done, the poop gets sealed up in a plastic bag, to await the next space trash day.

9 May - 8 min - Uploaded by Michael Interbartolo informative behind the scenes look at how the space shuttle toilet works. Astronauts can urinate into a long tube with a vacuum system sucking away the waste or they can sit down on a special space toilet on board the ISS. "The airflow keeps everything going down the pipe," Major Peake explains, "Simple as that." Have you ever wondered what it's really like for an astronaut in outer space? From the exciting moments to the day-to-day details, from the serious to the.

The astronauts fasten themselves to the toilet, so that, their body won't float away. They then use a device similar to a vacuum cleaner to suck any wastes away.
