

Leona, a Native American transgender (male to female), former Black Ops soldier/mercenary who is now a rebellious and innovative biology researcher/professor, is called back to the Rez when her brother Paul dies of mysterious and very under-investigated causes. Upon arriving back home in a new mostly-female body that few recognize and even fewer accept, Leona discovers that the Casino where Paul worked that brought in lots of money for the Tribe is being run by very White Mobsters who are using it as a sex-slave/human trafficking and weapons sales operation. Most of the once-traditional tribal members of the Band are okay with the operation, keeping their mouths and ears closed, and are well paid for their Silence. The reward for speaking up is to be silenced forever, such as Paul's suicidal demise. The only hold-outs against the modernization that is occurring are Granny (an eccentric old medicine woman who is now considered so, like, yesterday) and Leona's father, an ex-Red Power radical activist who has given up fighting the Palefaces, advising Leona to do the same. At the head of the operation that has taken over the Rez is Boris, ex-KGB mobster who once worked with Leona when she was Leon in viciously-run Black Op missions that officially didn't exist. Leona is forced to dig deep into herself to use the best elements of being male and female, scientific and spiritual, kind and vicious so she can defeat the Army of Palefaces that have taken over her home and its people, and if unstoppable, could perpetuate global slavery and warfare of the worst kind. Amidst a myriad of obstacles, miscalculations and betrayals. And with the aid of some very unexpected friends.
