

Excerpt from South Australia, Its Advantages and Its Resources: Being a Description of That Colony, and a Manual of Information for Emigrants The present work is for the most part the result of seven years personal observation in the Colony of South Australia, and contains, from this source, detailed statements on the prospects of labourer and farmer, on Agriculture, Stock Farming, Building, Gardening, Manufacturing in various branches, and last, not least, on Mining and Mineral Productions, in that flourishing Colony. The style of the book is, the Author presumes, much in correspondence with the subject; for though the horny hand of toil cannot make fine strokes with the pen, yet it may represent the demands, the works, and the rewards of human labour.
